To Whom It May Concern:

It has been our pleasure as a company to work with Creative Web Designing in building a new web page for Royal Chevrolet Olds Cadillac. When I made my first inquiry to the company via email, Lee immediately called me and an appointment was set to meet and discuss our needs. Within a week of our first contact, our new webpage was being designed and built.

I found the company to be very responsive to our change requests; plus they researched our "business type" on the web and came back with suggestions for our page which came from other automotive sights. Our page loads fast and has some unique characteristics to it. We love it!

I highly recommend Creative Web Designing if you are looking for a company that understands the internet and will create a page quickly and at a very reasonable price.

Sincerely,

Diane Tilton  
General Manager
